Mighty Mac™ SSAS Series
## Supermax-Level Safety: Introducing the Industry's
First Virtually Impenetrable Light Fixtures

Safety First. Always.

The SSAS series is intended for ceiling surface mounting to concrete or steel surfaces. The large, heavy-gauge flange provides for secure attachment. Light distribution evenly fills the cell so that most require only one fixture to meet ACA or FBOP illumination requirements.

Kenall's new Mighty Mac SSAS family of fixtures are designed for any security level facility, up to and including Supermax. These luminaires are impervious to vandalism and contraband concealment, adding an extra layer of security that keeps your staff and inmates safe.
