Indigo-Clean™ Continuous Environmental Disinfection for Surgical Suites

Indigo-Clean Installation,
Henderson Hospital, Las Vegas, NV

USA Designed and manufactured in the USA
A Revolutionary New Technology to Continuously Disinfect the Environment

*Indigo-Clean™*, a continuous disinfection technology, is patented and proven to kill harmful bacteria linked to hospital acquired infections (HAIs).

Using a combination of 405nm Indigo and White LEDs, Indigo-Clean emits narrow spectrum light that kills bacteria while providing ambient illumination for the space.

Unlike UV light, Indigo-Clean uses safe, visible light to automatically and continuously kill harmful bacteria in the air, and on hard and soft surfaces.
What is Indigo-Clean?

The Problem:
Current environmental disinfection methods are applied at discrete moments in time (i.e. episodically). The results of achieving a "clean room" are short-lived as harmful bacteria re-populate the space.

The Solution:
Indigo-Clean offers a solution that continuously disinfects the environment and bolsters your current infection prevention efforts.

Break the Chain of Infection by Raising Your Standard of Clean

The healthcare environment is a reservoir for pathogens. Indigo-Clean breaks the chain of infection between the environment and an unsuspecting host.

Indigo-Clean, a patented continuous environmental disinfection technology, uses visible light to safely, automatically and continuously kill harmful bacteria, 24/7, in the air and on hard and soft surfaces.

Indigo-Clean bolsters current infection prevention methods and is proven to kill a wide range of harmful bacteria.

What Makes Indigo-Clean Unique?

- Indigo-Clean is an environmental disinfection device that is integrated into your lighting
- Continuous environmental disinfection kills bacteria missed during routine cleaning
- Indigo-Clean is NOT UV light... it uses safe 405nm visible light
- Automatically kills bacteria, reducing risk of human error
- Kills bacteria in the air, and on hard and soft surfaces
- No special or additional training required
- Light is safe for patients and caregivers
- Does not require consumables
- Can be fully automated when used with recommended Indigo-Clean IC100 Controls
How It Works*:  
- The 405nm emitted from Indigo-Clean reflects off of walls and surfaces, penetrating harmful micro-organisms.  
- The 405nm light targets and excites naturally occurring molecules within the bacteria called porphyrins, to produce intra-cellular Reactive Oxygen Species (ROS).  
- Similar to bleach, these ROS create an oxidative environment within the organism, inactivating it and preventing it from re-populating the space.

Visible light spectrum showing the active element in Indigo-Clean™

405 nanometers: Peak germicidal activity via photoexcitation of porphyrin molecules

Inactivation of bacteria via visible light absorption

What Does Indigo-Clean Kill?

ESKAPE Pathogens:
- Enterococcus faecalis
- Staphylococcal Aureus (incl. MRSA)
- Klebsiella pneumoniae
- Acinetobacter baumannii
- Pseudomonas aeruginosa
- Enterobacter species

As well as a range of other organisms:
- C-diff
- VRE
- Aspergillus niger
- E.coli
- Salmonella enteritidis

Non-Exposed
Exposed to
Indigo-Clean™

Continuous Reduce Overall Bioburden by 70%+ with Indigo-Clean™

Clinical testing has shown Indigo-Clean can achieve a continuous 70%+ reduction of harmful bacteria in the environment. At the same time, recently published studies show that improved cleaning can reduce HAI rates for certain organisms.

These results, combined with the additional cost per patient due to HAI, suggest that preventing even a single infection would create a positive ROI and drive down costs for healthcare providers.

"Although we knew the Indigo-Clean™ lights would give us substantial results given the thorough research and studies done on the lights at medical centers across the nation, we were thrilled when our results were even greater than we anticipated."

- Lynnelle Murrell, Director of Infection Prevention, Maury Regional

Henderson Hospital Installs Indigo-Clean Lighting in All of the Operating Rooms
Unique Technology Keeps Patients Safe by Continuously Reducing Harmful Bacteria in the Environment

“Maintaining a safe, clean environment for our patients is our number one priority. Indigo-Clean safely, automatically, and continuously disinfects the environment, which means there is no need for room downtime when it (the operating room) is in use.”

– Sam Kaufman  
CEO & Managing Director, Henderson Hospital

The Kenall product shown on this page is designed and manufactured in the USA with components purchased from US suppliers, and meets the Buy American requirements under the ARRA. Kenall has not determined the origin of its domestically purchased components or the subcomponents thereof.
Indigo-Clean (MedMaster M4SEDIC) supports the surgical team, the patient and the surgical suite’s critical environment:

- Continuous environmental disinfection
- Sealed for infection prevention
- IP65 listed per IEC 60598 ensures ingress protection against dust and water
- NSF2 listing supports ease of cleanability
- Antimicrobial finish
- Certified to MIL STD 461F to address EMI/RFI issues
- High performance LED delivers high visual acuity
- Universal grid-flange mounting provides field installation flexibility
- Lens uniformity reduces glare
- Standard dimming offers flexible light levels

M4SEDIC14
Switchable - White Disinfection Mode and Indigo Disinfection Mode

Nominal Size: 1’x4’
Installation Types: Grid, Flange
Lamp Types: White LED and Indigo LED
Standard Listings: Wet Locations, IP65, NSF2, MIL STD 461F
Est. LED Life: 125,000 Hrs.

M4SEDIC22
Switchable - White Disinfection Mode and Indigo Disinfection Mode

Nominal Size: 2’x2’
Installation Types: Grid, Flange
Lamp Types: White LED and Indigo LED
Standard Listings: Wet Locations, IP65, NSF2, MIL STD 461F
Est. LED Life: 125,000 Hrs.

M4SEDIC24
Switchable - White Disinfection Mode and Indigo Disinfection Mode

Nominal Size: 2’x4’
Installation Types: Grid, Flange
Lamp Types: White LED and Indigo LED
Standard Listings: Wet Locations, IP65, NSF2, MIL STD 461F
Est. LED Life: 125,000 Hrs.
Two Operating Modes and Proprietary Controls Make Indigo-Clean Simple to Use

White Disinfection Mode
Provides comfort and visual acuity. Use during procedures and cleaning. Ambient white light + indigo for continuous environmental disinfection.

Indigo Disinfection Mode
Typically used when room is not in use. Indigo disinfection mode provides increased continuous environmental disinfection.

During periods of occupancy, this IC100 control system is designed to set the Indigo-Clean fixtures into White Disinfection Mode, which provides comfortable white light, yet maintains a level of continuous disinfection to harmful bacteria. After the room has been unoccupied for a time, the control system will set the Indigo-Clean luminaires to Indigo Disinfection Mode, which provides maximum disinfection to harmful bacteria.
High Quality, High Performance
Indigo-Clean (MedMaster™ M4SEDIC*)

The MedMaster M4SEDIC is a top-rated luminaire that delivers superior lumen and color maintenance over time and addresses the current demands for infection prevention, functional reliability and sensitivity to surrounding medical equipment. From concept to completion, every element of the MedMaster M4SEDIC LED luminaire has been carefully engineered to present the ideal solution for today’s surgical suite.

Sealed Housing
- One-piece, seam-welded housing construction
- Smooth exterior with gasketed doorframe for cleanability
- Universal housing for both flange and grid installation
- Antimicrobial finish
- Grounded wireway reduces radiated emissions

Internal Components
- Dual-stage power factor correction driver eliminates flicker
- Standard 0-10V Dimming
- Proprietary mode controller with low voltage input

LED Module Array with Indigo-Clean Technology
- Serviceable white LED array
- High-quality, ceramic composite, mid-power LEDs and high-power 405nm Indigo LEDs
- 80 and 90 CRI

Lens Door/Frame
- Diffused, high-efficiency lens for reduced glare and uniformity
- Smooth exterior doorframe is sealed and gasketed to support infection prevention

Flexibility with Universal Grid/Flange Installation

Flange mounting applications use four adjustable swing-out brackets for fast installation, and ensures a tight seal to the ceiling surface.

Compact 4” depth housing design allows for reduced plenum intrusion.

Fully sealed housing with closed cell gasketing ensures ingress protection against contaminants. The luminaire is ETL Certified IP65 per IEC 60598.

Inset door provides a flush mount to the ceiling.

*Patents Pending

Kenall Partners with the University of Strathclyde to Create Indigo-Clean

Kenall proudly partners with the University of Strathclyde’s Robertson Trust Laboratory for Electronic Sterilisation Technologies (ROLEST) to create Indigo-Clean. This technology is a part of the university’s long history of disinfection science dating back to the 1800’s. Kenall has the exclusive North American patent rights to create Narrow Spectrum (HINS) lights proven to kill a wide range of bacteria that are linked to HAI’s.

Professor Scott MacGregor, Vice-Principal at Strathclyde, developed the HINS-light technology with fellow Strathclyde researchers Professor John Anderson, Dr. Michelle Maclean and Professor Gerry Woolsey.

Professor MacGregor said, “Our partnership with Kenall in the United States is an exciting new chapter, which will see this innovative technology become a commercially available product. We chose Kenall because of their extensive experience in providing lighting for the most challenging healthcare environments where infection prevention is a key consideration.”

History of Academic Research and Investment in Visible Light Disinfection

- 2002: Investment in ROLEST from the Robertson Trust, University of Strathclyde
- 2003: Scottish Enterprise Proof of Concept Funding
- 2005: NHS Research / Medical Charity Funding
- 2006: Research Funding for other Decontamination Applications
- 2007: Clinical evaluations started at Glasgow Royal Infirmary
- 2009: 2011
- 2010: 2012: 2014
- 2015: Indigo-Clean Commercially Available
- 2017: 2016 Kenall’s First Operating Room Installation
- 2017: 2017 Kenall expands product line

---

The Kenall product shown on this page is designed and manufactured in the USA with components purchased from US suppliers, and meets the Buy American requirements under the ARRA. Kenall has not determined the origin of its domestically purchased components or the subcomponents thereof.
Listings & Certifications

Fixtures designed for use in healthcare applications must satisfy a large number of demanding lighting and environmental requirements. Applicable listings are shown below. For the most up-to-date information, please refer to individual product specification sheets at www.kenall.com.

- NSF2—An NSF2 Listing denotes that the luminaire has been evaluated for corrosion resistance, cleanability and the ability of exposed material to withstand normal wear. This supports the infection control standards established by healthcare facilities as it indicates that the luminaire is easy to sanitize.

- IP65—UL Certified IP65 per IEC 60598 ensures that the enclosure is dust-tight and protected against jet streams of water from any direction without any harmful effects.

- MIL STD 461F—Military Standards testing measurements cover both radiated and conducted electromagnetic emissions in addition to maximum allowable amounts of emitted energy based on both frequency range and field strength. Luminaires meeting MIL STD 461F pose the lowest possible likelihood of causing EMI-related issues.

- ISO 5—Suitable for ISO 5, Class 100 Rated Rooms (FED-STD 209E). Measures the number of particles equal to or greater than 0.5 mm in one cubic foot of air. The measurement must not exceed specified particle limits in order for the space to be considered a controlled ‘clean room’ environment.

- UL/CUL Listed—The UL symbol signifies that Underwriter’s Laboratory (UL) has determined that a manufacturer has demonstrated the ability to produce a product complying with UL's requirements with respect to specific risk, performance under specific conditions, compliance with regulatory codes and specified standards, or any other conditions as determined by UL.

- ETL—A product bearing the ETL Listed Mark is determined to have met the minimum requirements of prescribed product safety standards as certified by a Nationally Recognized Testing Laboratory (NRTL). The mark also indicates that the manufacturer’s production site conforms to a range of compliance measures and is subject to periodic follow-up inspections to verify continued conformance.

- ADA Compliant—Although ADA is not specific to lighting, it does impact fixture design by creating standards for wall sconce projection space and hanging light clearance. Section 4.4 of the ADA states that “objects projecting from walls with their leading edges between 27” and 80” above the finished floor shall protrude no more than 4” into walks, halls, corridors, passageways or aisles.”

Warranties

On behalf of our valued customers, Kenall promises to stand behind our medical-grade luminaires. Our commitment to excellence enables us to offer a variety of product warranties including the Kenall exclusive 5-year LED power system warranty.

**LED 5-year Warranty**

Kenall’s LED products are warranted by Kenall to be free of defects in workmanship and materials for a period of one (1) year from the date of invoice. Kenall warrants LED lamps and internal power regulation components for a period of five (5) years from the date of invoice against defects in materials and workmanship that result in a fixture depreciation of 30% or greater. Lumen depreciation is compared to the published lumen output of the product on the date of manufacture per IESNA LM-79 reporting procedures. Normal accumulation of particulates on the optical surfaces shall not be factored into the lumen depreciation. Kenall reserves the right to issue credit, repair, or replace the defective merchandise, at its discretion, upon notification and confirmation by its local representative of the defect. Kenall also reserves the right to test and examine the defective product if the defect is questionable, and to deny the warranty herein for any product altered, improperly installed, or installed in applications for which it is not intended. This includes operation in ambient temperatures above stated limits for any length of time. Failure by electrical surge shall not be covered under warranty.

Kenall assumes no responsibility for labor or freight costs incurred in connection with the installation, removal, or replacement of products determined to be defective or any other consequential or incidental damages arising from the use of the product. Kenall’s entire liability on any claim of loss or damage resulting from a defective product is limited to the replacement price of the product.
