

EnviroPro™ IMP Sealed Top Access LED Luminaire for Insulated Metal Panel Ceilings Reduces Overall Operating Costs Three Ways. Reduce the Number of Luminaires Needed, Cut Input Watts and Lower Cooling Costs.

EPMP Series

Kenall's new EnviroPro™ IMP is an IP rated, sealed LED high-output, top-serviceable 16" x 20" luminaire that can reduce your IMP ceiling cutout by 40% while protecting the integrity of Insulated Metal Panel (IMP) ceilings. The EPIMP Series luminaires also have the following benefits:

- Input watts: 211 and 333
- Lumen range: Up to 37,000 lm
- Lumens per watt: 88–123 lm/w
- 90,000 to 125,000 hr. LED lifetime (L70)
- Remote heat extraction reduces cooling costs
- Resistant to accidental foot traffic
- Exclusive optics effectively distribute light in medium and high-ceilinged spaces while providing glare control
- Self-capping, fully gasketed: stainless steel trim provides tolerance for ceiling cutout with no need for caulk
- Designed for four-or-six-inch thick insulated ceilings
- Integral emergency battery pack available

Distribution Options

Choose from wide, medium and narrow distributions to meet the needs of every installation.
